

Safety Flooring

Wet play safety is a priority for Hippo and is at the heart of each of our products and services.

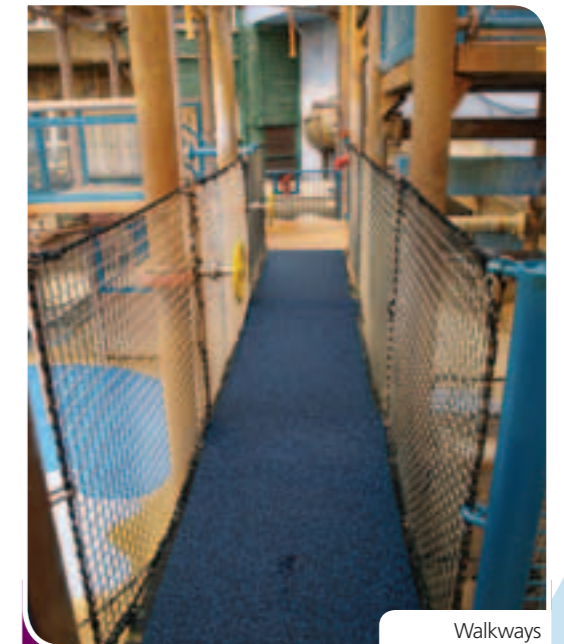

Our special anti-bacterial Aquatrol Safety Surface is an effective solution to preventing accidents and injury in many wet play areas.

Custom made pads of any shape or size. Price subject to site survey.

The new safety surface is providing our customers with the best protection possible against the danger of injury, especially for our younger bathers. The bacterial testing has remained consistently low and the surface requires minimal maintenance. Hippo have been extremely innovative in their development of this product and have been quick to support us with immediate repairs, advice and priority customer service. The flexibility of the installation process has enabled us to roll this out without the need to shut down or close areas to the public ensuring we remain operative 24/7.

Kevin Carr, Waterpark Manager, Alton Towers

Safety Surface Features:

- Anti-bacterial protection.
- Seamless application customised for areas of any shape or size, including unusual or awkward areas.
- Impact absorbing (approved critical fall heights).
- Slip and trip proof.
- Low maintenance.
- Strong and long lasting.
- Soft on children's feet.
- Available in a variety of solid and mixed colours.
- Logos and custom shapes can be added.

The performance of the poolside safety surface has been outstanding with many positive comments from parents with young toddlers who are unsteady on their feet. The bright flooring has great customer appeal and is proving resilient to mass customer use.
