Guildford Lido

Project
**Trio of Flume Slides
and Splash Toys**

Project Value
£500,000

Hippo has completed the transformation of the Guildford Lido into an outdoor water park! Hippo supplied the design, manufacture and installation of 3 multi-active flume slides.

A two lane multi slide will appeal to all ages enabling racing amongst friends and family. For the more daring there is a Kamikaze drop slide giving the rider a thrilling experience as they plunge down the slide into the waiting aquacatch. Finally the Anaconda slide provides a more varied ride including twists to both sides as the rider snakes down to the end.

Additional features include interactive play panels and interactive toddler slides installed in the two toddler pools. The area has been completed using Hippo's soft, anti-slip safety floor in both toddler pools. The water depth has been reduced to 10cm allowing toddlers and babies to play safely with the interactive toys.

The flume slides have been positioned alongside the Lido so that they can be enjoyed without disrupting those using the pool. The new installation has something for all ages and abilities which will help boost revenue and increase visitors.
