Haven Holiday Park,
Burnham-on-Sea

Project
Suspended Span Arms Feature
and Interactive Channels

Hippo has recently installed a range of high and low level water play features at Haven Holiday Park, Burnham-on-Sea. The indoor teaching pool has been transformed into a highly interactive, fun and exciting water play area aimed at increasing water confidence. A short mast supplies 2 interactive water channels with a flow of water which toddlers will enjoy manipulating through the channels and back into the pool. Older children will love the surprise and anticipatory element of the large tipping buckets, water wheels and shark showers which are suspended above the pool on a span pipe. High level water spraying, tipping and showering at regular intervals will create a big splash of excitement amongst the whole family.
